Experience

IotaScales

Software Developer

June 2025

- Worked as a Backend Developer on **Atrios DNS Security**, **GenesisVPN**, **DragonFly**, **OmniPriv PAM**, and **Astro Dome**.

Education

Air University, Islamabad

BS in Computer Science

Sept 2021 – June 2025

Projects

- **Atrios DNS Security:** Enterprise DNS security platform providing DNS filtering, threat intelligence integration, policy enforcement, analytics dashboards, and secure network access management.
- **GenesisVPN:** Secure VPN management platform supporting user provisioning, subscription management, traffic monitoring, and centralized administration.
- **Atrios IPAM:** IP Address Management solution enabling subnet planning, IP tracking, allocation management, and network inventory monitoring.
- **OmniPriv PAM:** Privileged Access Management platform providing credential vaulting, role-based access control, session monitoring, and audit logging.
- **Astro Dome:** Infrastructure management platform designed for centralized administration, monitoring, automation, and secure service orchestration.
- **Social Media Graph API Integration:** Unified backend integration for Facebook, Instagram, X (Twitter), Pinterest, and YouTube APIs supporting analytics, content management, and automation workflows.
- **Down Syndrome Learning Platform (TheraLearn):** Comprehensive MERN-based educational platform featuring gamified therapy modules, psychologist dashboards, progress tracking, blogs, and role-based management.
- **Discord-App-Block-Chain (Dappcord):** Ethereum-based DApp using smart contracts and PoS consensus, with MetaMask integration for seamless wallet access and data integrity.
- **Block-Chain-NFT-Market:** Decentralized NFT marketplace facilitating secure, transparent, peer-to-peer trading of Non-Fungible Tokens through blockchain technology.
- **BetterAim:** A game featuring various power-ups, increasing difficulty levels, and engaging sound effects for an entertaining user experience.

Technologies

Languages & Frameworks: C++, Node.js, Express, MongoDB, React, Angular, Flutter, Next.js, Firebase, Dart, Bootstrap, Tailwind, GO, Python

Tools & Platforms: .NET, Microsoft SQL Server, MS Office, Postman, Photoshop, Linux

Certifications

Full-Stack Development

- MERN Stack Front To Back: Full Stack React, Redux & Node.js Specialization — Coursera (5ZD-HBPRW4LAT)
- Introduction to Front-End Development — Coursera (FGADEBFXR2MZ)

- Advanced React — Coursera (N8FGBHFVJTDW)
- React Basics — Coursera (7DLTE79XT7BN)

DevOps

- Introduction to DevOps — Coursera (B4EQGXU426T4)
- Introduction to Cloud Computing — Coursera (7VYKMAFDFVFG)
- Containerization Using Docker — Coursera (FUG87A96W3KK)
- Containerize a Full-Stack NodeJS Application in Docker — Coursera (W9V5FED5LEZ7)
- Manage Your Versions with Git — Coursera (CTU0JINE2RWH)
- Version Control — Coursera (39FZ6A9M6BBB)

Project Management

- Foundations of Project Management — Coursera (CVBNBY3J5YSL)
- Introduction to Agile Development and Scrum — Coursera (F4ZKALU39M43)

Other

- Solidity for Beginners: Write and Test Smart Contracts — Coursera (EXPP4DK2BQ1C)
- C for .NET Developers — Coursera (4M5JC92ZWQNN)
- Introduction to Networks and Cisco Devices — Coursera (U6K5CZDSEG63)
